PROFESSIONAL SUMMARY

Final-year Bachelor of Science in Statistics and IT student with practical experience in data analysis, SQL, Python, Microsoft Excel, database management, and IT operations. Gained hands-on experience during an industrial attachment with Nairobi County Government (City Hall), working with administrative databases, processing datasets, preparing analytical summaries, and supporting technology-driven workflow improvements. Strong foundation in statistics, quantitative analysis, database systems, and programming, with a particular interest in Data Analytics, Business Intelligence, Data Engineering, and Applied AI.

TECHNICAL SKILLS

- **Data & Statistics:** Statistical Analysis; Quantitative Analysis; Statistical Modeling; Data Cleaning & Preparation; Trend & Pattern Analysis; Data Visualization
- **Programming & Databases:** Python; SQL; Relational Database Management; Database Query Optimization; Object-Oriented Programming
- **Data Tools:** Microsoft Excel - Advanced; Data Analysis; Data Reporting; Data Visualization
- **AI & Emerging Technology:** AI Tools & Workflow Integration; Basic Machine Learning; AI-Assisted Process Automation
- **IT & Systems:** Database Administration; Technical Troubleshooting; Network Troubleshooting; Software Deployment; IT Support
- **Additional Technologies:** JavaScript; HTML/CSS; MQL5

PROFESSIONAL EXPERIENCE

Nairobi County Government - City Hall IT & Data Attachment Intern | Nairobi, Kenya | April 2026 – August 2026

- Executed SQL queries to maintain, update, and retrieve information from administrative databases.
- Cleaned and processed datasets using Python and Microsoft Excel, preparing analytical summaries for departmental reporting.
- Applied quantitative methods to analyze numerical information and identify relevant trends and patterns.
- Supported database operations and assisted with maintaining efficient access to administrative information.
- Provided technical support including network troubleshooting, software deployment, and day-to-day IT assistance.
- Researched and recommended AI-driven tools for automating repetitive data-entry

- activities and improving operational workflows.
- Worked alongside IT and administrative teams to troubleshoot technical issues and support daily operations.

EDUCATION

The Co-operative University of Kenya | Nairobi, Kenya *Bachelor of Science in Statistics and IT* | 2023 – 2027 (Expected) *Relevant Coursework:* Statistical Computing; Time Series Analysis; Database Systems; Object-Oriented Programming; Web Development; Data Analytics; Data Engineering

Moi High School - Kabartonjo Kenya Certificate of Secondary Education (KCSE) | 2019 – 2022 | *Grade: B*

SELECTED DATA PROJECTS

Financial & Quantitative Data Analysis Model *Python* | *Quantitative Analysis* | *Data Visualization*

- Developed Python scripts to analyze historical numerical data and identify trends and dynamic patterns.
- Applied quantitative techniques to investigate patterns within datasets.
- Created data visualizations using Python plotting libraries to support interpretation of analytical results.
- Developed automated logical-processing scripts for quantitative data tasks.

Database Management & Query System *SQL* | *Relational Databases* | *Database Design*

- Designed relational database schemas for structured data organization.
- Developed SQL queries for efficient data retrieval and database management.
- Optimized database queries to improve search and information retrieval.

CERTIFICATIONS & TRAINING

- **Data Science & Statistical Computing Preparation** | Safaricom Technical Assessment Practice, 2026
- **Global Consumer Intelligence & AI Applications** | Coursework & Applied Workshops, 2026

CORE STRENGTHS

Analytical Problem Solving | Statistical Thinking | Data Interpretation | web development | Database Management | Technical Troubleshooting | Communication | Team Collaboration
